## Explanation

Claims 126 to 276

The inventions set forth in claims 126 to 276 are novel and involve an inventive step relative to documents 1 and 2 cited in the international search report.

Documents 1 and 2 do not specifically disclose the quaternary ammonium salt represented by formula (1) set forth in claim 126. Meanwhile, taking into consideration the disclosures in the test data and the like in the description of the present application and in the annexes to the response to the written opinion, said salt produces the advantageous effect of having superior electrical conductivity compared to a salt having a similar structure to the 1-methyl-1-methoxyethyl-pyrrolidinium tetrafluoroborate disclosed in document 1, which has a different length of alkylene group at substituent position 1 on the cation.
